BOSNIA-HERZEGOVINA

Regulatory and Energy Assistance Project in Bosnia-Herzegovina (REAP)

Who is REAP?

The objective of the USAID Regulatory and Energy Assistance Project (REAP) is to support the full integration of the BiH energy sector into the regional and EU market. The REAP project is a four-year project that started in March, 2007, and is a continuation of the previous two USAID projects that were of great importance for the reform of the electricity sector up to this point.

How does REAP support the energy sector?

In order to work towards integration of the energy sector into the regional and EU market, REAP advises with regard to the establishment of legal and regulative framework for gas, gives technical assistance to the Independent System Operator (ISO), and assists with regard to implementation by the Entities of their reform Action Plans, which were approved by their respective legislative bodies. Most importantly, another component of REAP is a public outreach program to inform the public about peculiarities and challenges in the energy sector create communication plans for the public, project partners, governments, parliaments, the media and NGOs.
